DETAILED ACTION

1. This Office Action is in response to applicant's amendment filed on September 22, 2005.

Allowable Subject Matter

2. **Claims 1,3-6,8,9,11-16,18,20-22 and 32 are allowed.**

Reasons For Allowance

3. The following is an examiner's statement of reasons for allowable subject matter:

Claims 1,9,18 and 32 are allowable over the prior art of record because the teachings of the references taken as a whole do not teach or render obvious the combination set forth, including that the latch is hingedly connected to the chassis and that sliding manipulation of the locking mechanism at the first side, which is mounted to the panel, causes the release and secure of the latch.

Cheng (US 6,373,692) discloses a securing mechanism comprising a panel (1) for adjustably connecting to a chassis (3) substantially along a first side. A latch (2) is mounted to a second side of the chassis (when the panel is secured to the chassis). A locking mechanism (4) is provided to release and secure the latch.

Webb (US 6,772,613) discloses a securing mechanism comprising a panel (40) for adjustably connecting to a chassis substantially along a first side. A latch (80) is mounted to a second side of the chassis, substantially opposite the first side, for latching the panel. A locking mechanism (50) is provided to release and secure the latch (when the padlock 50 is removed, a person can move the latch rod 80, Col. 6 Lines 29-37).

However, Cheng and Webb fail to disclose that the latch is hingedly connected to the chassis that sliding manipulation of the locking mechanism at the first side, which is mounted to the panel, causes the release and secure of the latch.

Cheng discloses that the latch (2) is hingedly connected to the panel and that pivotally movement of the locking mechanism will cause the release and the secure of the latch. Further, Cheng fails to disclose that the locking mechanism is mounted to the panel.

Webb discloses that the latch (80) is slidably connected to the chassis and that that sliding manipulation of the locking mechanism at the second side causes the release and secure of the latch. Further, Webb fails to disclose that the locking mechanism is mounted to the panel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
